1. DSD that has no sound
2. No key to press to acknowledge guards buzzer
3. No key to activate/deactivate DRA
4. Poor LOD's on windows giving a flickering effect as you go past. Game is great, cant wait for next chapter. Purchasing this through Steam was a huge mistake. 4 hours later and it is still not active in my account. Steam says to go ask Trion about it, Trion doesnt seem to want to respond to people on their website. I found a number for Trion but it informs you that they no longer offer phone support, the live chat support is also MIA from their site. This is the last purchase I will ever make through steam, not that they care I am sure.. Best game ive ever played hands down.. Nice 2d game :D. Startide is a strangely boring shoot-'em-up, strongly reminiscent of the 2003 freeware title Warning Forever mechanically but much slower-paced, to its detriment. Essentially the entire game is fighting bosses by destroying them part-by-part from the extremities inward, since only the outermost parts on a limb take any damage, with the scaling falling off such that hitting any part other than the two outermost is almost worthless.

So, it's all about slowly circling enemies, minimizing the amount of hits you take, and slowly wearing them down. Of course, with a system where you both regenerate health and destroy the boss's weapons as you fight, this means that essentially all stages get easier as they go on, which contributes to the tedious feeling. Likewise, there's not all that much difference between stages - some will have time limits, and some will have breaks for asteroid fields (which are to your advantage, since you regenerate health and super bar during this time), and as you go on you fight five different alien races, three of which have their own gimmicks, two of which matter - except for stages where you are attacking supply trains, which are similar (you still destroy armed parts coming off the train, from the outside in, then destroy the "core" that contains the supplies) but involve different enough mechanics that they at least feel like something different.

Startide is also not free of minor issues that I felt dragged the game down. The biggest one is that I felt the 4th alien race was the hardest to fight by far, which made the entire end of the game where you fought the 5th race feel very anticlimactic. Another is that, instead of getting notably harder (except when you fight the 4th race) or more interesting, stages just require you to fight more bosses in a row, which increases both the likelihood that you'll mess up and die sometime during them, and makes you have to replay even more when you die. The least and silliest gripe is that the game gave me a giant laser cannon with only one fight left before the rest of the game was fighting the 5th race, and due to how the mechanics interact, the giant laser cannon is useless against the 5th and final race of aliens.

Ultimately, I don't think I was expecting tedium from a shoot-'em-up. It's a genre with quite a few bad entries, but few boring ones, but Startide somehow managed to be. Check out Warning Forever instead, it's a significantly more fun freeware take on many of the same ideas.

(Postscript: Startide has a workshop functionality, but I felt it was somewhat limited in terms of being able to create interesting things due to fairly low "cost" limits, hopelessly degenerate designs like my Invincible are quite possible, and there's no real ship design community for the game. It's at least fairly easy to use, but I didn't think it was notable in any way.). nice additional division brings more diversity to the base game.

this game is cool. This is already a great experience despite being only partially complete. The jungle looks great and the dinosaurs are spot on. I don't remember reading about any spaceships falling to Earth during that period, hence the alternate history storyline, but aside from that, the graphics come off as realistic and period accurate. I often just watch the dinosaurs interacting with their environment--from a distance mostly. Great job, Crynosaurus, stay on it!. Would recommend if free. Also, you must like this kind of humor.

Kind of funny to discover with someone else I must say.. The game has too many issues, first of all **THE FREAKING GAME DOESN'T EVEN START UP**. Like, seriously guys, I have been trying to fix this game over the span of almost 3 YEARS and it still doesn't work. The PC ports for these Arkham games are so terrible (Arkham Knight am i rite guys?). I bought this on sales which was great and I really love batman but mannnn if the game doesn't even work, why bother selling, many other people also has this issues but not all of course. But damn, please, this is bullcrap.. nice game,cool :). Honestly great game having my nostalgic years from back using my cousins laptop, recommend anyone to buy this
